

Ampco Pumps Company

Ampco Pumps Company is a domestic pump manufacturer specializing in food processing grade pumps. Our L Series, AC Series and ZP Series pumps include 100% interchangeability with the most popular brands of centrifugal and positive displacement pumps (hydraulically, dimensionally, and part-for-part). Additionally, our high standards include value added upgrades – notably, a free stainless steel gear case on each new positive displacement pump.

ZP3 Positive Displacement Pump

The ZP3 pump offers a patent-pending front-loading seal for ZP Series pumps. This seal is designed to 3A standards, is ATEX certified and has passed the stringent EHEDG clean-ability certification process. In addition to being fully clean-in-place, the seal can be serviced without the need to remove the body and piping. The ZP3 offers a standard four-mount stainless steel gear case. ZP2 style pumps can easily be converted to a ZP3. Easy maintenance and reduced downtime make the ZP3 an excellent choice for processing dairy products.

Centrifugal Pumps –

AC, AC+, L series, SP series, LH series

Ampco's 3A Certified line of centrifugal pumps: The AC Series offers low cost, high value, part interchangeability, and fast delivery. Our AC+ offers an improved shaft design, the first significant improvement in the traditional "C Series" style of pump. Our high efficiency L Series is a perfect solution for cream, ice cream, buttermilk and whey. L series pumps and parts are interchangeable with competing pumps. The LF offers a front-loading seal for ease of maintenance. Ampco's SP Series of liquid ring pumps are ideally suited for CIP return applications and handling products with entrained air. The LH Series high pressure pump offers the following features: closed coupled design, inlet pressure up to 600 PSI, space savings, eliminates alignment problems, and is aggressively priced.

AC+ Dry Blender/PM Powder Mixer/ PI Powder Inducer

Ampco offers an extensive selection of blenders and mixers that are customized to each application. Our application engineers work with customers to select the right product for each system. Blend wet and dry ingredients together without clumps and drastically reduce processing time. Create a better mixture of yogurt, sour cream, ice cream mix, flavored milk or pudding. Trial units are available.

The Ampco Advantage "Redefining Engineered Excellence"

Ampco offers the most complete line of

pumps, blenders and mixers in the food processing industry. Our goal is to deliver quality products, excellent customer service and competitive pricing. To better serve our customers, we have recently completed a 25,000 sq. ft. addition to our Glendale, Wisconsin facility. We invite you to visit our facility in person and allow Ampco to show you how we engineer and manufacture the best sanitary pumps in the world!
