

# Supplier Capabilities Spotlight

## Axon

Axon develops and manufactures a complete range of shrink and stretch sleeve labeling systems for the dairy industry. More than 30 years of innovation, reliability and customer support excellence results in Axon today enjoying the trust and loyalty of leading companies worldwide.

- Shrink Sleeve Applicators: Achieve maximum shelf impact with machines that apply 360° full body decorative labels to virtually any container shape. Our shrink sleeve applicators offer the widest layflat range in the industry with speeds up to 800 cpm.
- Tamper Evident Band Applicators: Shrink seals provide cost-effective protection of product integrity. Axon offers a wide variety of systems and designs for applying tamper evident bands to

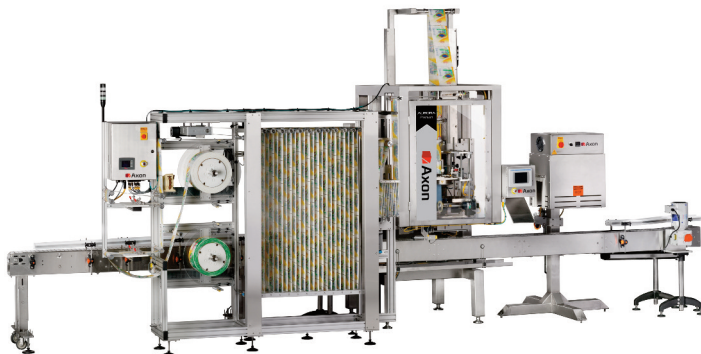

various shaped dairy products, from yogurt to ice cream containers.

- Multipack Sleeve Applicators: Shrink sleeves can be an ideal solution for certain multipack configurations. Our equipment can be easily configured to apply multipacks of practically any size and shape.
- Heat Shrink Tunnels: We offer a full portfolio of proven infrared, convection, and steam shrink tunnels that guarantee optimal shrink performance and product presentation.
- Stretch Sleeve Applicators: our Styrotech brand offers the most precise and energy efficient stretch sleeve application technology in the market.
