Bright Technologies

Liquid Product Destruction and Recycling

Bright Technologies, a Division of Sebright Products Inc. offers the Xtractor, a modular system for Liquid Product Separation and Packaging Compaction. The Xtractor and its support components provide a means of perforation and crushing of full beverage containers to extract the liquids and reduce transportation costs of the packaging for recycling while insuring total product destruction.

The Xtractor can process aluminum cans, plastic and aseptic packaging at rates up to 10 cubic yards per hour in the same equipment making it suitable for most beverage operations and recyclers. This rugged machine has stainless steel construction and delivers up to 70,000 Lbs of force to provide long life and maximum liquid removal. The modular concept of the components allows many different configurations to suit the application. The equipment's sealed design keeps the liquid contained and off your floors. Standard features include: stainless steel construction, liquid collection pan, removable liquid deflection shields, 10 HP hydraulic power unit, Allen Bradley MicroLogix 1400 PLC, NEMA 4X Control enclosure, Optional components offered for the system include: container perforator, three models of feed conveyors, two standard hoppers, custom hydraulic cart dumpers, discharge chutes and discharge container trolley.
