

Prolamina

Prolamina

It's not only what's inside that counts

Led by a team of industry veterans, Prolamina is a \$300 million flexible packaging supplier that focuses on value-added innovative solutions for the food, medical and specialty markets. Prolamina continues to experience industry leading organic growth, part of which can be attributed to their expansion and proven performance in dairy markets such as lidding, natural chunk, retail and institutional shred cheese packaging.

Bulk Shredded Cheese

PRO-FLEX food service VFFS film for 5, 10, and 15 pound shred cheese is an abuse resistant packaging film for bulk shredded cheese. In addition, this film has excellent hot tack properties for high speed applications.

PRO-FLEX™ Cheese Films

Prolamina's PRO-FLEX films are specifically designed to address dairy processors demanding applications for chunk, sliced, institutional and retail shredded cheese. With increased need for package durability and line speed performance, PRO-FLEX films allow processors to remain laser focused on their product, while having the assurance that our cheese films will meet their packaging needs.

Chunk & Sliced

Prolamina's patent pending HFFS film for chunk and sliced cheese is specifically designed for high speed applications and is suitable for re-closable zipper applications. In addition, these films have high abuse resistance that protects the integrity of the cheese.

Retail Shred

Prolamina's award winning HD flexographics printing will ensure that your brand stands out on the shelf. We offer easy open applications with in-house laser scoring and re-sealable applications with zippers.

We've got you covered.

In today's demanding food-packaging industry there is a greater demand for portion control, easy access and portability in consumers' choice of packaged foods. As a result, containers with removable lids and membranes are gaining popularity.

Prolamina's lidding solutions: PRO-PEEL™ and PRO-SEAL™ are foil and non-foil based lidding solutions. Both offer medium to high barrier characteristics and excellent sealability thru potential

contaminants. PRO-PEEL and PRO-SEAL are offered in die-cut and rollstock forms.

The PRO-PEEL lidding solution has consistent peel performance and one-piece removal. It also features our proprietary sealant technology that is compatible with PP, PS, CPET and HDPE container stock.

PRO-SEAL offers customers a dependable and permanent seal custom designed for specific applications. Prolamina produces lidstock for various applications and can accommodate customers' unique packaging requirements.

Expect More.

Anticipating the changing needs of their customers, Prolamina continually invests in cutting-edge manufacturing equipment in all three North American facilities: Westfield, MA; Neenah, WI; and Terrebonne Quebec. With over 750,000 square feet of manufacturing space, Prolamina has unified its facilities to grasp natural synergies and redundant capabilities providing supply chain certainty to their customers.
