

## Extrutech Plastics, Inc.

Interlocking Liner Panels provided by Extrutech Plastics offer superior sanitary surfaces for ease of cleaning and sanitizing on a daily basis; food safe, perfect for incidental food contact. The panels are USDA and CFIA accepted, offer a bright white, high gloss, easy-to-clean, non-porous surface that resists damage, corrosion and brightens any working area. These products are cleanable, 100% waterproof and will not rust, rot, corrode, peel or discolor and are ideal for high moisture areas where daily sanitation is critical to the operation and health and safety inspectors.

Our stable of products include the 12", 16" and 24" wide wall and ceiling liner panels, suspended ceiling panels, clean rooms, partition walls, doors, our new concrete form system that offers the same

easy-to-clean, non-porous surface as our liner panels, and various new trims, cellular base trims and boards. Our new trims include a bull nose outside corner, 6" base board, 2x2 and 3x3 outside corners, and various other corner trims. The Extrutech panels are available in many colors including Red, Blue, Green, Yellow and now "Black" and "Woodgrain" colors for that "special" look for a spectacular visual effect, in your facility.

For 28 years, since 1992, Extrutech Plastics has specialized in custom manufacturing of high quality, water

proof building components in Manitowoc, Wisconsin. Extrutech is a certified ISO 9001-2015 QMS manufacturer and a U.S. Government supplier. All products are made in the USA, by Americans, with only USA made materials. We offer a 20 year liner panel warranty. Call us at 888-818-0118 or visit our website for more information.
