

## Ampco Pumps Company

Ampco Pumps Company is a domestic pump manufacturer specializing in food processing grade pumps. Our L Series, AC Series and ZP Series pumps include 100% interchangeability with the most popular brands of centrifugal and positive displacement pumps (hydraulically, dimensionally, and part-for-part). Additionally, our high standards include value added upgrades – notably, a free stainless steel gear case on each new positive displacement pump.

### NEW ZP1+ Positive Displacement Pump

Ampco is pleased to introduce the new patent-pending ZP1+ (available in models 30 and larger). The ZP1+ is a true maintenance time saver! O-rings can be changed without having to disconnect the pump from the piping system. ZP1 style pumps can be easily upgraded to a ZP1+.

### ZP3 Positive Displacement Pump

The ZP3 pump offers a patent-pending front-loading seal for ZP series pumps. This seal is designed to 3A standards, is ATEX certified and has passed the stringent EHEDG clean-ability certification process. In addition to being fully clean-in-place, the seal can be serviced without the need to remove the body and piping. The ZP3 offers a standard four-mount stainless steel gear case. ZP2 style pumps can easily be converted to a ZP3. Easy maintenance and reduced downtime make the ZP3 an excellent choice for processing butter, cream, curds, soft cheese, milk or yogurt. Ampco's ZP3 pumps can handle any application that currently uses a ZP2 style pump.

### L Series Centrifugal Pump

The 3A certified, high efficiency L Series is a perfect solution for cream, ice cream, buttermilk and whey. L series pumps and parts are interchangeable with competing pumps. The LF offers a front-loading seal for ease of maintenance.

### AC+ Dry Blender/PM Powder Mixer/PI Powder Inducer

Ampco offers an extensive selection of blenders and mixers that are customized to each application. Our applica-

tion engineers work with customers to select the right product for each system. Blend wet and dry ingredients together without clumps and drastically reduce processing time. Create a better mixture of yogurt, sour cream, ice cream mix, flavored milk or pudding. Trial units are available.

### The Ampco Advantage

Ampco offers the most complete line of pumps, blenders and mixers in the food processing industry. Our goal is to deliver quality products, excellent customer service and best pricing to our customers. To better serve our customers, we

have just completed a 25,000 sq. ft. addition to our Glendale, Wisconsin facility.
