

Supplier Capabilities Spotlight

ANDRITZ Separation, Inc.

You now have other options, with, **ANDRITZ** which manufactures and produces high speed clarifiers and separators for the Dairy Industry. In addition, **ANDRITZ** offers a wide range of separation equipment including decanter centrifuge's, filter press's, belt filter press's, rotating filters, screens, helical mixers, dryers, bioreactors and dynamic cross flow filters.

The **ANDRITZ** high speed clarifiers and separators are designed for liquid-based applications. High centrifugal force and large surface area (disc stack) allow for the separation of liquids from liquids with removal of solids at the same time. Both clarifier (liquid-solid separation) and separator (liquid-liquid-solid separation) are offered for a wide range of capacities and processes.

Our skilled process and technical personnel are available for onsite process

evaluation, equipment demonstration and lab testing of feed slurries or mixtures. **Andritz** has positioned itself to provide a full line of separation equipment for the following processes: **Dairy (3A certified)**, Wine & Juice, Nutraceuticals, Beer, Vegetable Oil and Rendering.

ANDRITZ understands that reliable service and spare parts availability are important to its customers. **ANDRITZ** has more service and spare parts facilities than most any other manufacturer and is able to provide service on not only

ANDRITZ Separation

their own equipment but all competing manufacturers. Our facilities are located throughout North America. **San Leandro, CA; Pittsburg, TX; Scott Depot, WV; Arlington, TX; Florence, KY; Lakeland, FL and Saskatoon, SK.**

Just call **(800) 433-5161** or email us at **separation.us@andritz.com** and ask to speak to one of our food specialists dedicated to your service area.
