

Supplier Capabilities Spotlight

Fortress Technology Inc.

Never Obsolete: Fortress Detectors Are Always Supported

Fortress Technology continues to provide complete support for their existing systems with readily available parts and a global service team.

Their latest technology can quickly and economically be installed in a detector built over 15 years ago, ensuring their customers stay up to date with food safety initiatives without having to purchase a new detector.

Service

Fortress Technology has built their reputation on providing the highest standards of customer service in the industry. You receive the best, most efficient response whenever you require their help! They have service representatives all over the country to make certain their customer gets the fastest and most reliable service.

HACCP/FSMA Compliant Software Included

Fortress's Contact Reporter software comes with Stealth Detection Systems. The USB feature of Stealth detectors allows quick access to QA reports and audit ready documentation. A simple plug and play application, it is easy to set-up and use.

Optimal Metal Detection

Fortress custom designs and manufactures their equipment to suit your needs and specifications, thereby ensuring optimal metal detection within your facility.

Not sure if you're getting the most out of your metal detection system?
