

SupplierCapabilities Spotlight

Machine and Process Design, Inc.

For the past 26 years, Machine and Process Design Inc. has focused on the design and fabrication of high quality processing equipment to meet the needs of our food and dairy customers. Our product line offers a variety of equipment including Crushers, Rigmills®, Crumblers, Choppers, Santi-Trac® Belt conveyors, Vibratory Conveyors, Vibratory Screening Conveyors, Tumbling/Coating Drums and many sizes of Live Bottom Storage/ Surge bins.

Machine and Process Design provides a single source for your size reduction and material handling applications including customized and sanitary designs to suit food and dairy applications and requirements. Our Rigmill® is used to grind cheese, whey, lactose, whey protein concentrate, skim milk powder and other dairy powders. Our Dual Rotor Crushers are used to break up lumps in dairy powders and other cheese products. We have supplied Sani-Trac® Belt Conveyors for both cheese and powder applications. Customers have come to depend on our easy to clean and maintain designs that provide years of reliable performance.

Our team of highly skilled craftsmen takes pride in fabricating our quality, long lasting equipment. We look forward to provid-

ing our customers with economical and value added solutions now and in the future.

Visit our website at www.mpd-inc.com to see the complete line of quality equipment that we offer for your process.
