## Schneider Packaging Equipment Co., Inc.

Schneider Packaging Equipment Co. specializes in complete “end-of-line” solutions for specialty cartoning, case packing, case sealing and palletizing needs. Schneider Packaging has over 44 years of experience bringing upstream dairy product “right to the truck.” Schneider’s gable top or plastic jug case packing solutions are available as a horizontal side or vertical bottom load configuration and will pack half-gallon, half-pint, pint, quart, gallon, and other size gable top cartons or plastic jugs into corrugated containers. The open, accessible construction is available in stainless steel heavy wash-down construction, stainless wipe down, or painted carbon steel.

Schneider’s new high-speed top loading Robotic Vertical Carton/Case Loader (RVCL) equipped with FANUC Robotics delta robots for accumulating, top load carton and case loading, in high-speed pick and place applications is designed to handle multiple products and packing combinations. The RVCL uses delta robots and advanced vision guided robotics to locate, inspect, orient and nest product for high-speed top carton or case loading. Even products with a complex shape can be tightly packed, minimizing packaging materials and maximizing sustainability. The system is capable of loading standard RSC cases, HSC cases, top load cartons, and display trays. Product can be loaded horizontally for bulk packing or vertically for high impact point of sale display trays.

Designed for superior efficiency and reliability, the TP-35 state-of-the-art horizontal aseptic brick tray packer, accumulates bundled bricks into proper pack patterns and loads the bricks from 125 to 250 milliliters for high speed tray packing and is available for Rapid Ship.

**WE'RE YOUR SOURCE** FOR PUTTING  
FLEXIBLE PACKAGING INTO CARTONS AND CASES.

**CARTONING  
CASE PACKING  
ROBOTIC PALLETIZING  
END OF LINE INTEGRATION**

Packing flexible bags can be a lot like herding cats. Squishy... arbitrary placement on conveyors... hard to pick up and orient... But with Schneider, whether your bags are big or small... we can automate the process of getting them cartoned, sealed, palletized and wrapped in one smooth flexible system. Contact us today for more info.
