

## Südmo

Finding a process partner that successfully blends safety, efficiency, total cost of ownership, and innovation is imperative in the competitive marketplace dairy producers face. With Pentair Südmo you have the latest technology from the company that has been providing sustainable process plant fluid management solutions 50+ years.

### Attention to What is Most Important

**Safety** – Complete safety to prevent CIP fluids into product even when the valve seals are missing or damaged. No accidental cross contamination.

**Efficiency** – Reduce labor costs by removing the flow plates and the swing connections. Transfer product when needed, not at the end or start of the day. Eliminate the “end of day” CIP shift!

**Reliability** - Experience the lowest cost of ownership, longer maintenance intervals and less upset of your system with Pentair Südmo’s easy to maintain valves.

**Design Know-How** –Work with a valve supplier who can assist with your initial application design needs to get you to your production goals quickly.

### Process Solutions

Pentair Südmo’s proven products lead from a technology point of view. Our smaller 365it Complete was the first PMO mix proof valve on the market that does not require a full port leakage chamber to meet 3-A Sanitary Standard 85-02, which includes cleaning via valve seat lift in dairy plants.

### The 365it Complete PMO

- EHEDG certified Type EL Class I for in place cleanability
- Patented deflector provides a true mechanical barrier for secure separation of product / CIP
- Available in Cheese Curd Outlet and Tank Outlet versions

The 365it Complete PMO Mix Proof Valve ensure that dairy processors can safely clean valve clusters, leakage areas and lines during the day as tanks and process pipelines are emptied and the lines to the fillers can be cleaned and re-used immediately.

### The IntelliTop 2.0

Mix proof valves need feedback to meet PMO requirements. To comply with this and give our customers total process control, the 365it Complete PMO Mix Proof Valve is combined with the IntelliTop 2.0 control unit.

- Fast and easy setup
- IP65, IP67, IP69 protection classes

The 365it Complete with our IntelliTop 2.0 control unit provides the lowest Total Cost of Ownership when compared to traditional PMO mix proof valves on the market.

Start saving now – partner with Pentair Südmo, the supplier who assures that you will dramatically reduce your valve total cost of ownership to give you an advantage over your competitors.
