

Aseptomag

Aseptomag is a Swiss-based engineering firm that designs and fabricates aseptic and hygienic process valves and flow components. We have over 30 years of experience in the field of aseptics and we utilize our knowledge to serve our clients around the world.

Our aseptic valves are used in the areas of process engineering where the highest quality standards are required. Aseptomag is the market leader in this aseptic valve range and we are continually improving and expanding our product line. Our valves are known for their reliability, ease of maintenance, and a minimum amount of replaceable parts. Our goal is to provide the highest quality valves on the market while focusing on maintaining a low Total Cost of Ownership for our clients. We utilize modern fabrication techniques to pro-

duce our valves which can be integrated into compact modular skidded systems.

At Aseptomag we are able to assist our clients from the design stage, through fabrication, and all the way to implementation and start-up. Our products are highly adaptable to a vast array of processes and applications. If you have a special application and require a specific solution please feel free to contact our

aseptic technology

design department. We will work with you to develop a unique solution for your process.

More than 50'000 aseptic valves in daily operation !

Feedback Unit

Sampling Valve

Aseptic Shut-off Valve

Food Safety Mix-proof Valve

Aseptic Control Valve

Aseptic Double Chamber Valve

Aseptic - safety

Aseptomag AG specializes in aseptic and hygienic process engineering. We work in cooperation with our clients to develop specific and innovative solutions for the food, beverage, pharmaceutical and cosmetic industries.

Component Manufacture

We develop, design and build high quality components for process engineering systems. Our products are recognized for their outstanding quality, functionality and easy servicing.

Module Building

We design and carefully integrate process technology into compact modular skidded systems. We utilize the most advanced means of production to meet the needs of our international clientele.

We are your expert resource for all your needs:

- Design
- Engineering
- Manufacturing
- ...and servicing.
