## Evergreen Packaging Equipment

### Full line of gable top packaging solutions from Evergreen Packaging

Evergreen Packaging starts with the needs of your specific product and designs a packaging solution from paperboard to custom barrier formulation to filling equipment all tailored to keep your products fresh from source to table. In addition to freshness, paper carton packaging delivers compelling, creative and high-impact branding opportunities for your product.

Evergreen Packaging Equipment manufactures a full line of filling equipment for refrigerated dairy, juice and liquid food products. Gable top packaging equipment, which forms, fills and seals paper gable top cartons is ideal for pasteurized, ESL (Extended Shelf Life), and ELL® (Extended Long Life) applications. Individual machine models fill cartons from 4 oz. up to half-gallon (125 ml up to two liter) at speeds from 50 up to 340 cartons per minute. SPOUT-PAK® twist-off closures are also available for most gable top cartons.

Preserve maximum shelf life for your ESL/ELL products with Evergreen's EQ-70 and EH-3 packaging machines. The EQ-70 forms, fills and seals quart/liter cartons at speeds up to 7,000 cartons per hour (cph), and fractional sized cartons up to 9,000cph. Evergreen's EH-3 (up to 8,400cph) and EH-210 (up to 12,600cph) handle half-gallon/two liter cartons. Both machines utilize proven ELL features.

Run Time®, Evergreen's comprehensive parts and service program, includes a large inventory of OEM parts, knowledgeable support staff, and a strategically located certified technical service team available 24/7. Evergreen's number one goal is to keep processors up and running.

Take a *Fresh Approach*  
with The Shelf Life People.

You look at freshness  
from every angle  
to deliver quality  
products to your  
customers.

We focus on gable top filling technologies that help preserve maximum shelf life of low- and high-acid beverages such as milk, organic, plant-based, specialty dairy products, liquid egg products and still beverages.

With proven features such as controlled environment, a carton decontamination system, automatic sanitization and hygienic filling, it's no surprise that manufacturers worldwide rely on Evergreen equipment to fill their ESL (Extended Shelf Life) and ELL® (Extended Long Life) products.\*

Want to apply our fresh approach to your next product? Call us today or visit us at [www.evergreenpackaging.com/ESL-ELL](http://www.evergreenpackaging.com/ESL-ELL) . . . because we're The Shelf Life People.
